2025 – 2026

Key Courses: Foundation of A.I., Principle of Data Analysis & Programming, Business Data Management, Data Visualization, Programming with Generative AI, Big Data Analytics, Computer Vision, Intro to Large Language Models, Machine Learning for Business, Practical Applications of Deep Learning, etc.

Information and Computing Science (Bachelor's) | Hebei Finance University • Baoding

2019 – 2023

Key Courses: Advanced Algebra, Mathematical Analysis, Probability Theory & Statistics, Operations Research & Optimization, Cloud Computing & Big Data, Network Operating Systems, Computer Networks, Database Principles & Applications, Data Structures, Data Mining, Financial Accounting, Western Economics, Financial Markets, etc.

Internship Experience

Intern | Bank of China • Shijiazhuang

2021.07 – 2021.09

- Independently received an average of 30+ customers daily, accurately identified service needs and efficiently directed them to smart counters or teller windows, significantly improving customer flow efficiency.

- Guided customers through smart device operations for account opening, transfers, and other core services; patiently addressed all inquiries, achieving zero complaints throughout the internship period.
- Proactively supported counter operations during peak hours, assisted with document handling to ensure smooth branch operations during high-traffic periods.
- Maintained daily work reviews and reflections, continuously optimized service scripts and processes to improve personal service effectiveness.

Intern | **Beijing Qingcheng Boya Education Technology Co., Ltd.** *2020.07 – 2020.09*

- Studied computer science knowledge under senior instructors to strengthen programming fundamentals.
- Collaborated with colleagues on web page development; gained hands-on experience with Java and the Spring/Spring Boot framework.

Project Experience

Graduation Project | **Design and Implementation of a Commercial Bank Investment & Financing Platform System (Supervisor: Prof. Zhang Yujing)** *2022.11 – 2023.05*

- Researched the lack of investment and financing channels for the public and SMEs; proposed a fintech-based solution in line with digital economy trends.
- Built the investment and financing platform framework using Spring Boot; designed admin and personal center portals covering modules for financing project management, VIP project management, and user management.
- Addressed the integration of finance and technology to help commercial banks adapt to new financial models and enhance service capabilities and industry competitiveness.

Campus Experience

Organizational Department Officer | **Hebei Finance University Student Union** *2019.10 – 2020.09*

- Responsible for the recommendation, selection, and daily management of student cadres within the college.
- Assisted in carrying out tasks assigned by the university Party committee, ensuring alignment with institutional objectives.
- Developed strong organizational, coordination, and leadership skills through cross-team collaboration.
